PROFILE

I am a dynamic and well-rounded designer, with experience in exhibition design, interior architecture and graphic design. I am an Interior Designer by qualification, but my vast experience in exhibition design has allowed me to combine my two design passions - the architecture of space and visual graphic design. To me, the two disciplines are identical. They are both about balancing the positive and negative spaces. Its often what one does not see that makes a design successful. Just like in music, it is the space between notes that gives the piece depth and artistry. My core interests away from design include cooking, cycling and pondering how the cosmos works while taking long walks in the forest. I love playing my guitar and am the leader of a Jewish spiritual band called Neshama Music Project.
